

Commitment

Courage

Focus

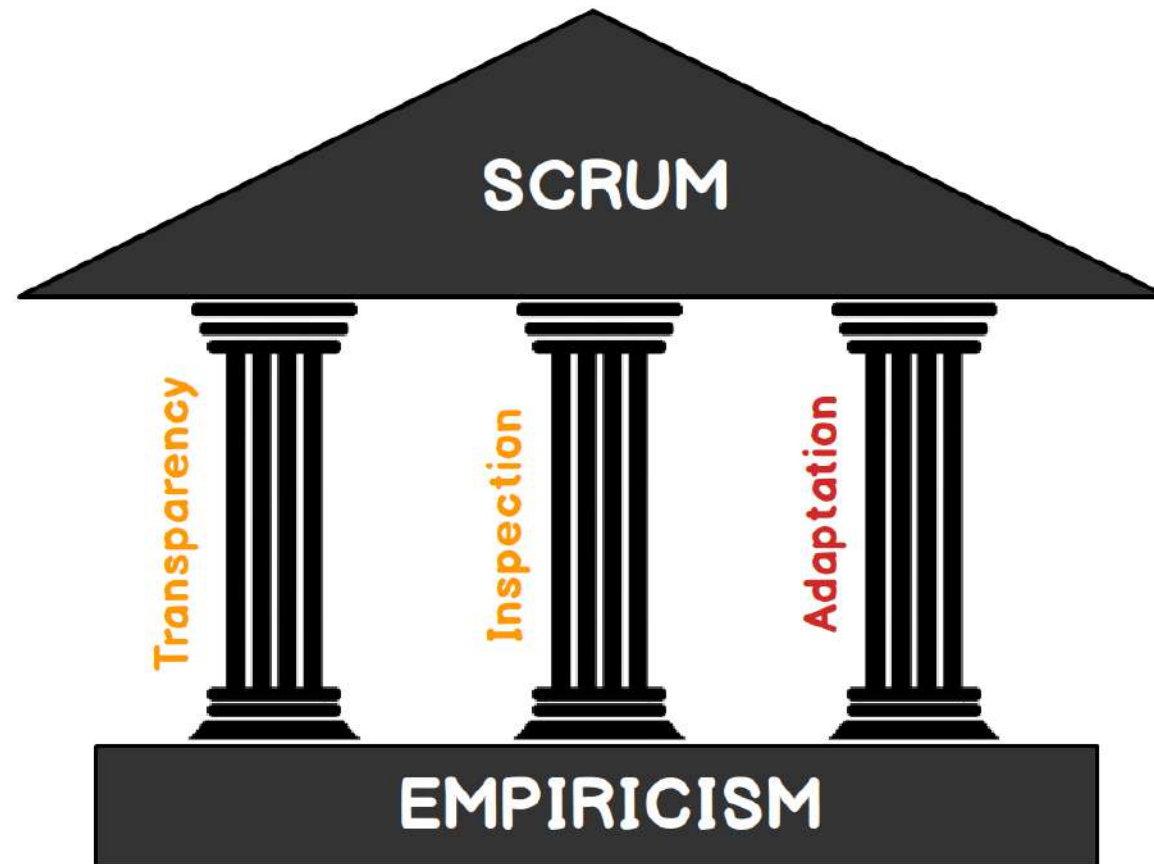

Openness

Respect

**Scrum
Values**

Scrum defines **three specific accountabilities** within the Scrum Team

The Scrum Master

The Developers

The Product Owner

One Product

PO

Product Backlog

Product
Goal:

Product Goal: A set of items that represent the product's future work. The items are ordered by priority, and the team works on them in that order. The Product Goal is a high-level statement of the product's purpose and the team's commitment to it.

The Product Owner Is Accountable For The Product Backlog And The Product Goal

The Product Owner

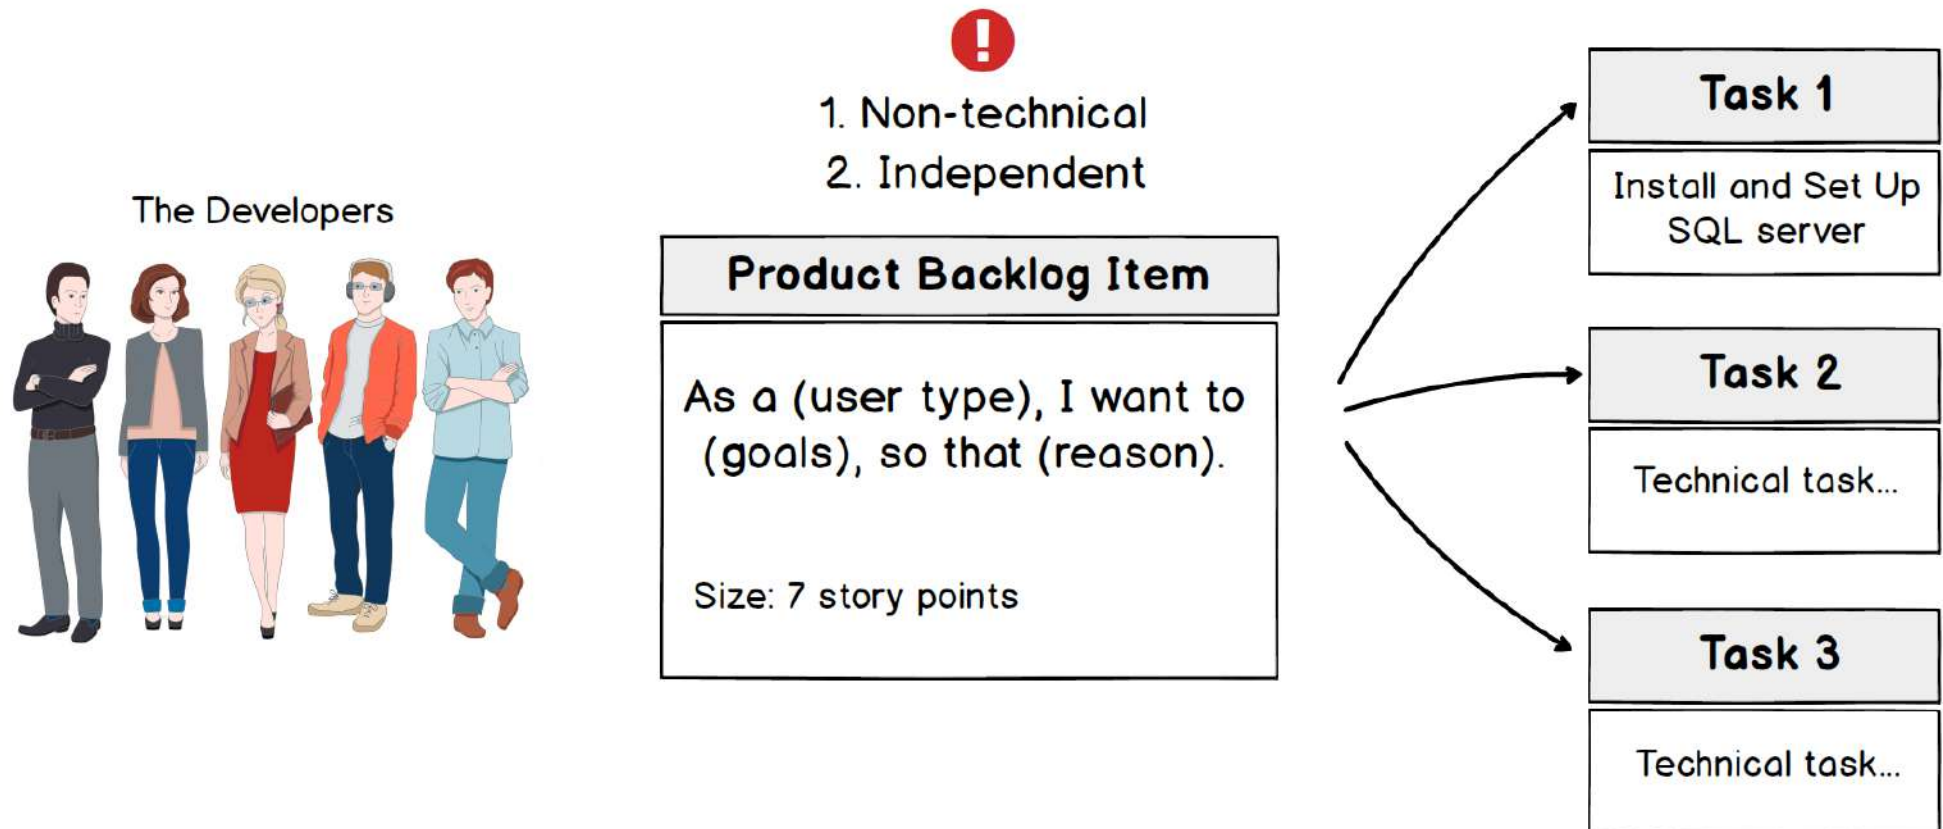

Scrum Artifacts & Their Commitments

- 1) The Product Goal is a commitment for the Product Backlog.
- 2) The Sprint Goal is a commitment for the Sprint Backlog.
- 3) The Definition of Done is a commitment for the Increment.

Decompose (Break Down) a PBI into Tasks.

This is the minimum
we want...

The Organization

DoD

(5 CRITERIA)

The Whole Scrum Team!

Great, we will follow it but
also add 5 more points.

DoD

(10 CRITERIA)

The Developers Use This
PBI As A Reference

Story Points

(A Relative Unit Of Size Measurement)

Product Backlog Item 1

As a (user type), I want to
(goals), so that (reason).

Estimation (Size): 10 story points

Product Backlog Item 2

As a (user type), I want to
(goals), so that (reason).

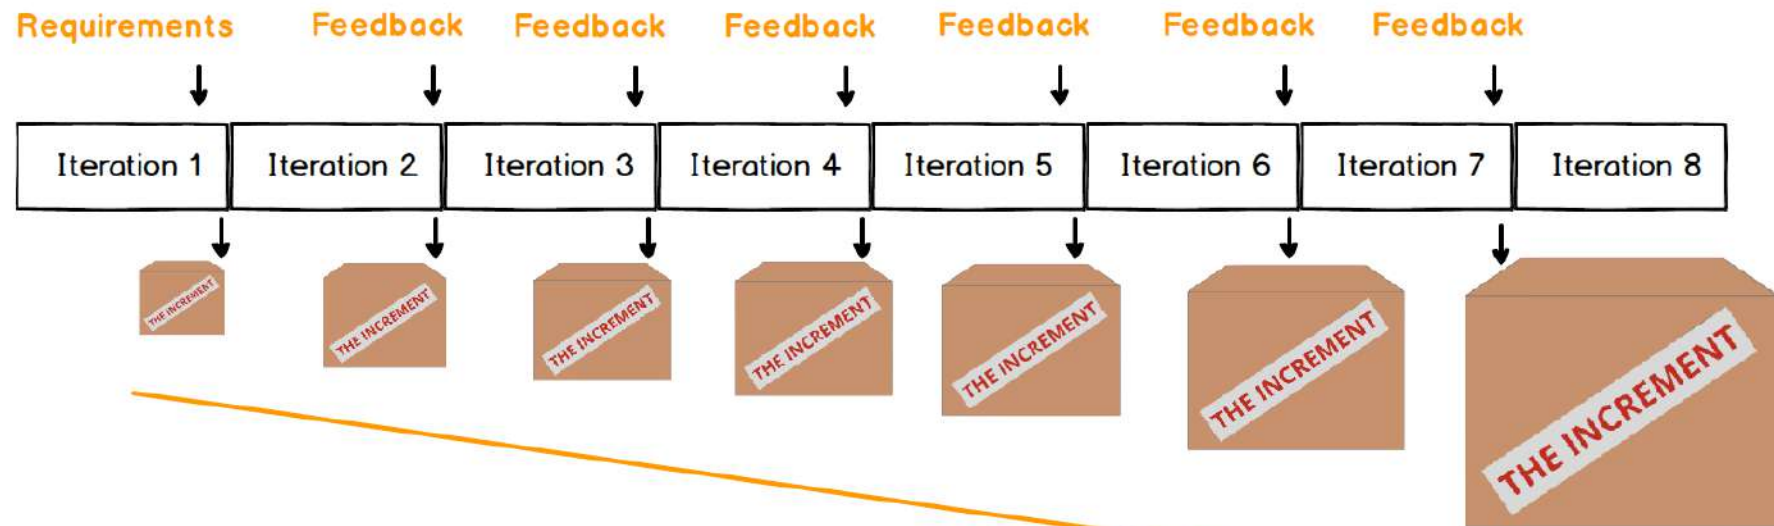

Estimation (Size): 20 story points

Product Backlog Item 3

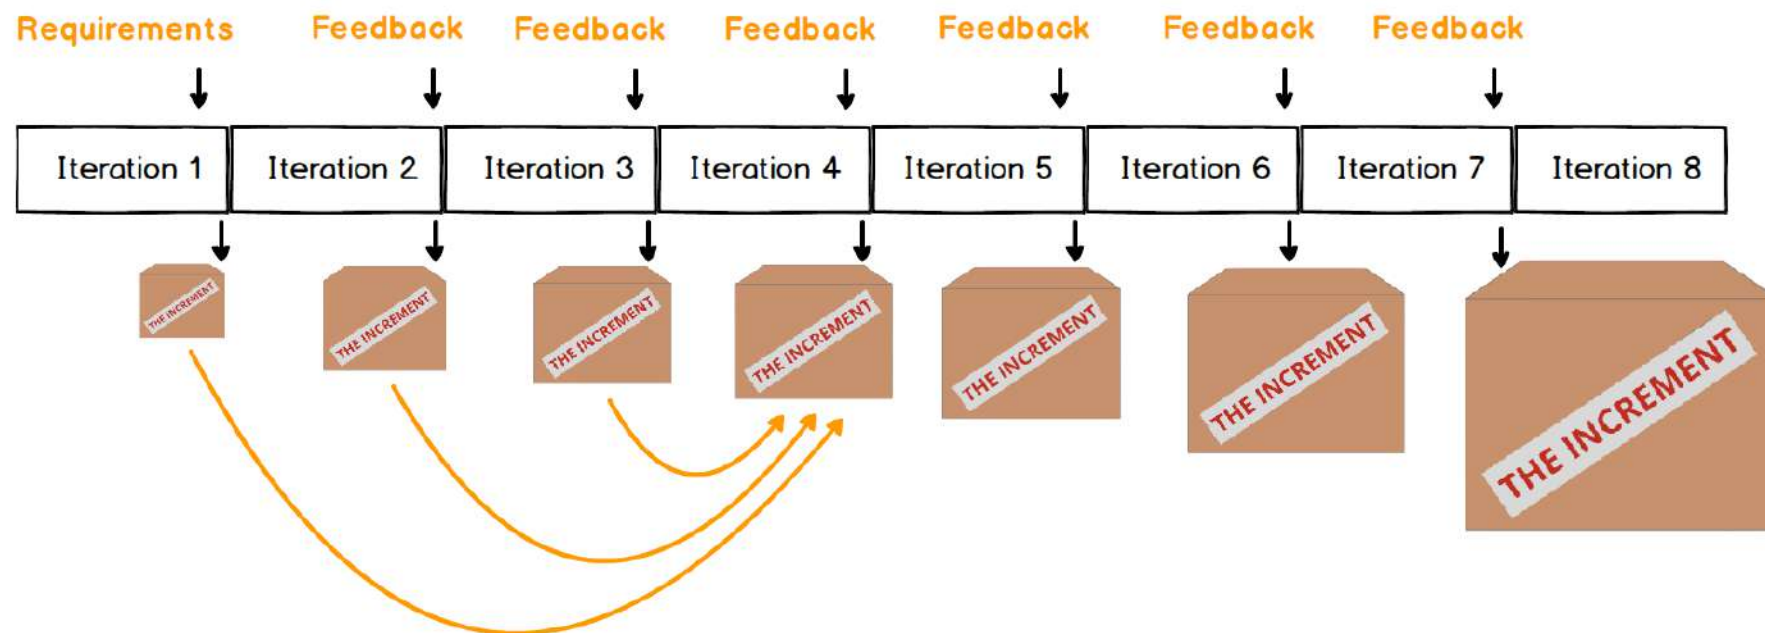

As a (user type), I want to
(goals), so that (reason).

Estimation (Size): 5 story points

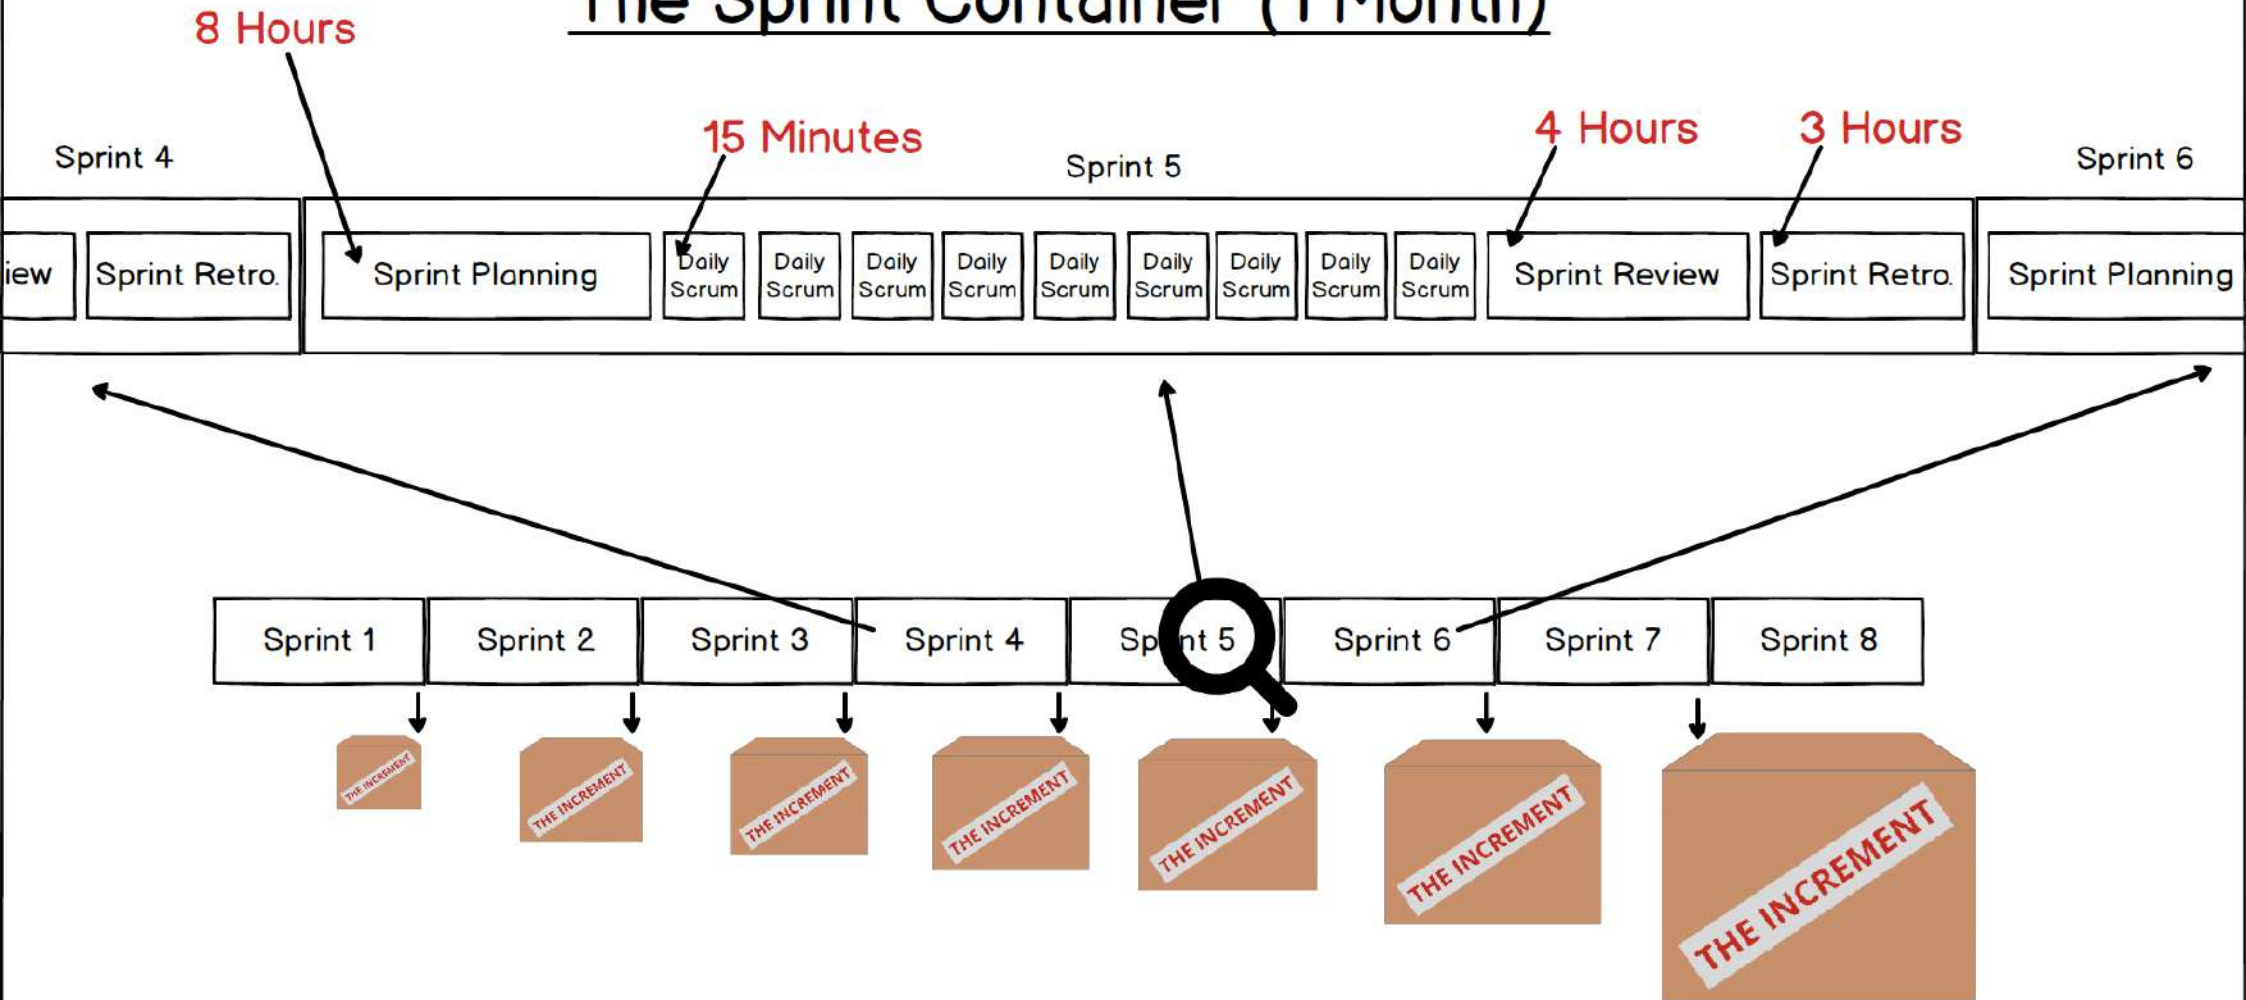

For PSPO1 & PSM1 exams,
using Story Points is NOT
mandatory in Scrum.

Incremental Development

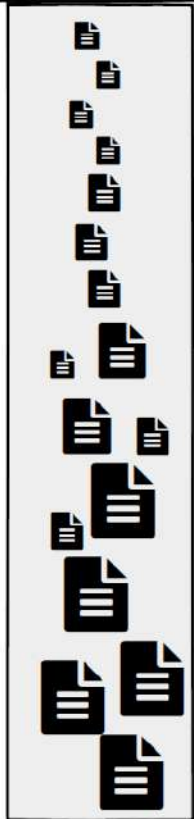

The Sprint Container (1 Month)

Product Backlog

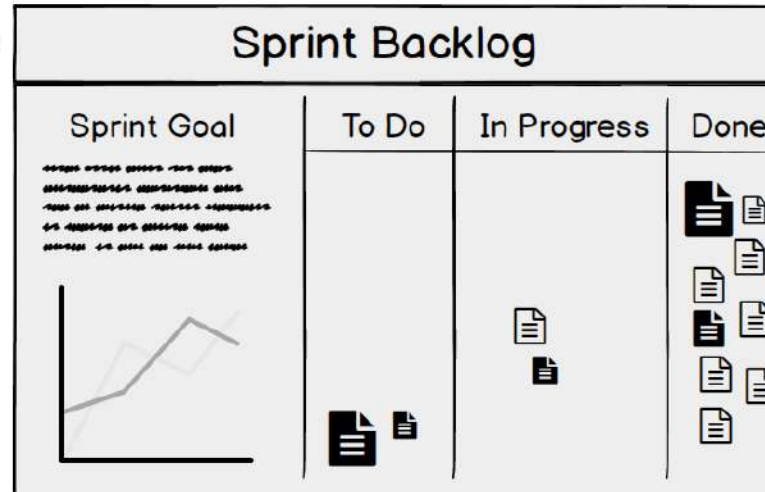

Product
Goal:

Product Goal: A set of business objectives that the product is intended to achieve. It is a long-term goal that guides the product development process.

During Sprint Review

Sprint Backlog

Done

Okay good, here is what the end-users say about the product so far...

Customer

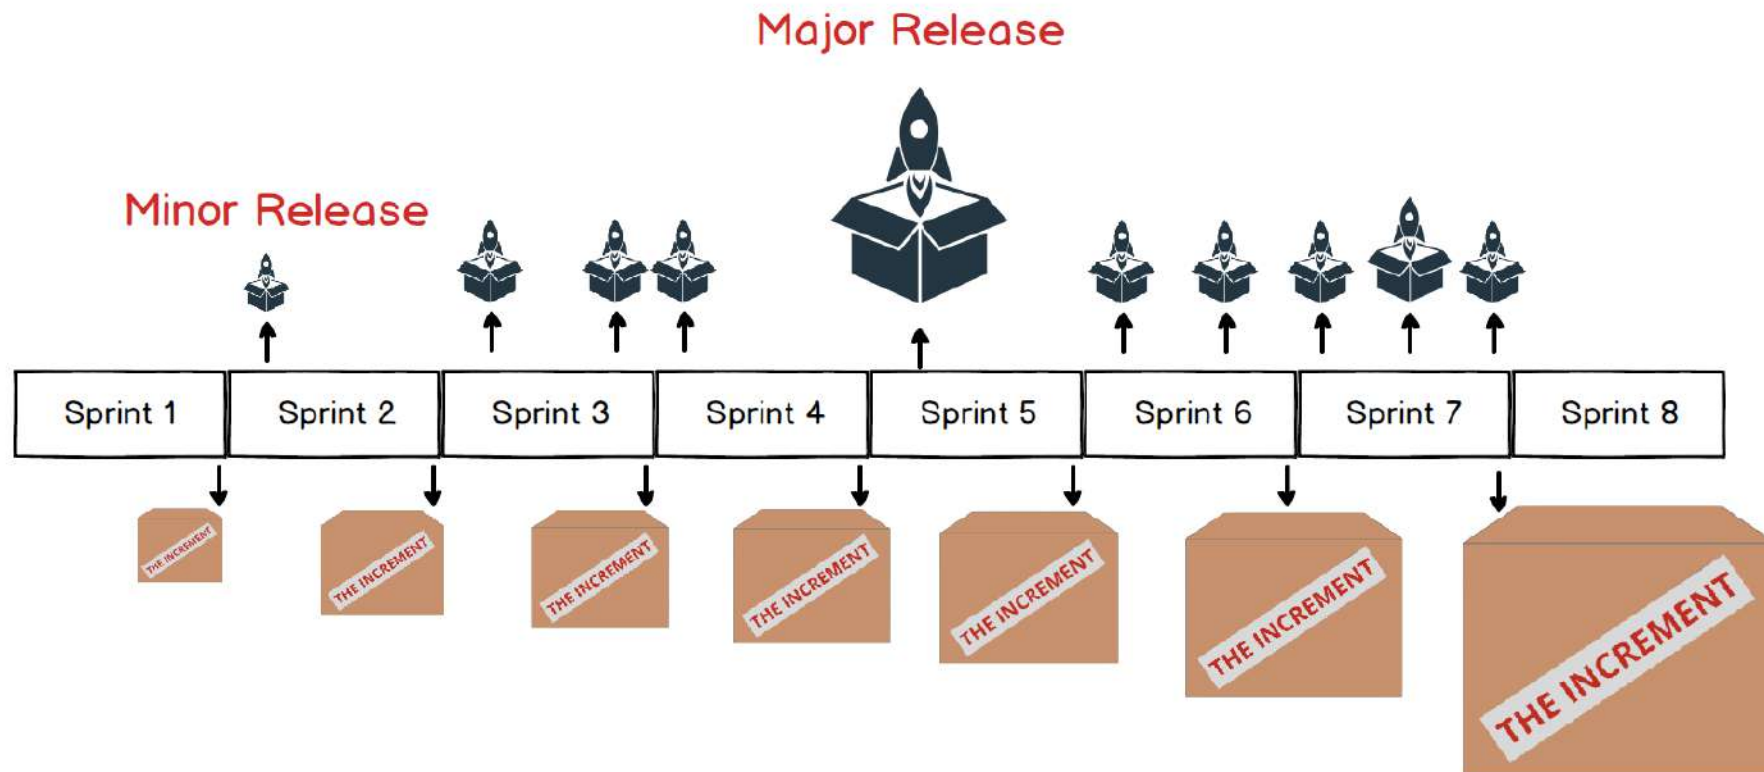

These items are done, these aren't...

This is what we built. Here is how it works...

Not All Releases Are Equal

5 Levels Of Conflict

by Lyssa Adkins (Coaching Agile Teams)

Constructive Disagreement is necessary
for a team to grow.
